"Your Hardware Merchants"

Russian Wheat Situation

Russia has been producing in recent years, on the average, about 650 million bushels of wheat per annum. This year it is said she has a bumper crop—some consider over 1,000 million bushels. Her production has greatly increased in the last ten years. The Soviet is now permitting the people to use wheat. Considering these factors, how much wheat will Russia have to spare for export to world's markets? Only time will show.

Hegland—Vagg

The United church manse at Lethbridge was the setting of a quiet wedding on Tuesday afternoon, November 12th, when Rev. J. M. Pritchard joined in marriage Miss Agnes Vagg and Earl Hegland of Carmanagay. The ceremony was performed in the presence of a few friends, with Mrs. Eskeland, sister of the bride and Alfred Vagg as attendants. Mr. and Mrs. Hegland will reside in Carmanagay.

Display Of Handicraft And Furs From Labrador

In the absence of Rev. Peter Dawson M. L. A., Mrs. Dawson conducted the evening service at the United church last Sunday. She was assisted by Mrs. Victoria Ray, matron of the local hospital, who addressed the congregation on her work in the Labrador Mission where she spent two years under the celebrated Dr. Wilfred Grenfell. A number of interesting souvenirs were on display including native handicraft which was designed by vocational workers and made from any odds and ends of material available and quite artistic when finished. A number of fox furs, muskies and models made out of packing cases and a costume of rubberized linen fabric guaranteed rain and wind proof, designed by Dr. Grenfell were also shown. Mrs. C. Melançon presented a solo, and an anthem by the choir. At the close of the service which was conducted throughout by ladies of the congregation, Mrs. Wilfridson, on behalf of Mrs. K. J. Esquimaug, Mrs. Dawson with an Esquimaug rug.

WARNING TO RADIO LISTENERS
OWNERS of unlicensed radio receiving sets are hereby warned that on and after 30th November, 1935, the Department of Marine will take steps to prosecute the owner or operator thereof. Broadcast listeners who have not already procured their licence for the current fiscal year are accordingly advised to obtain such licence immediately.

The licence fee is \$2.00 per annum. Licences may be procured from Post Offices in cities and larger towns, Departmental Radio Inspectors, Radio Technicians and others authorized to issue licences on behalf of the Department, or from Radio Branch, Department of Marine, Ottawa, Ont.

By order
R. K. SMITH,
Deputy Minister of Marine,
Ottawa, November 15, 1935.

Lethbridge Experimental Letter

The Prairie farm Rehabilitation Act. The second anniversary of the Lethbridge Experimental Station Weekly Letter comes with this issue and the occasion seems appropriate to refer briefly to some of the new and important work that is being carried on in connection with the Prairie Farm Rehabilitation Act passed by the Dominion parliament last spring.

This Act was designed to give assistance to farmers on the Canadian prairies where farming it must be admitted, is to a large extent a ceaseless struggle against drought. The productive power of the soil even in years of little more than average rainfall is a matter of established record, but past experience and the drought period of the past six years particularly have indicated clearly enough that it is the dry years that need to be provided for.

Continued on back page.

The Agreement With Dr. Freeze

THIS AGREEMENT made the 17th day of August 1935 between the Municipal District of Harmony No. 128, of Champion in the province of Alberta, hereinafter called the Municipality of the one part and Edwin H. Freeze of Champion aforesaid physician and surgeon, hereinafter called the doctor of the other part. Whereas by By-Law No. 12 dated the 17th day of August 1935 the Municipality was granted power to enter into a contract whereby a doctor or doctors be engaged to provide all medical and surgical attention (not including cases for a specialist such as ear, eye, throat and nose) for all persons residing within the boundaries of the Municipal District of Harmony No. 128, at a sum not to exceed four thousand five hundred dollars (\$4500.00) per annum.

NOW THIS AGREEMENT WITNESSETH that in pursuance of the said By-Law the Municipality hereby engages the doctor and the doctor hereby agrees to act as physician and surgeon from the date of the said By-Law for the Municipality, subject to the terms and conditions hereinafter contained, namely:

1. The term of employment as aforesaid shall continue until either party is desirous of terminating this agreement, then such party shall give to the other party thirty days' notice in writing of its intention so to do.

2. The remuneration payable by the Municipality to the doctor shall be the sum of \$4500.00 per annum, payable by monthly instalments at the rate thereof of \$375.00 per month, the balance thereof to be paid at the end of the year; the doctor first giving credit to the Municipality of all fees received by him in respect of first calls which shall be deducted from the aforesaid yearly remuneration of \$4500.00. The fees for the said calls receivable by the doctor shall not exceed the sum of \$2.50 for day calls and the sum of \$4.00 for night calls.

In the event of the termination of this agreement as aforesaid then the remuneration to the doctor and the fees payable in respect of the calls to be credited to the Municipality shall be apportioned and adjusted up to and at the expiration of this agreement.

3. The doctor shall provide all medical and surgical advice, attention and work as may be necessary and of which he is capable of performing in his own office, at the house of the patients and at the hospitals at Champion, Vulcan and Carmanagay; but in the event of the doctor desiring it necessary to call in a general surgeon, then the doctor will be responsible for the expense thereof. If, however, the service of a specialist is required, at such time as the expense of the patient exceeds such sum, PROVIDED however that in the event of an owner of land paying taxes to the Municipality on at least 100 acres of land situated within the Municipality and who resides within the Municipality, then the doctor shall give medical and surgical attention to such owner, but at his office and thereafter, it necessary as may at the hospital or elsewhere mentioned.

4. The doctor shall provide such medical and surgical advice and treatment as may be necessary to all non-resident inmates within the Municipality, and the doctor shall be entitled for such services to receive for his own use and benefit all fees and expenses incurred by him actually collected from the patient responsible for the payment thereof as provided by the Municipal District Act of the province of Alberta or any other Act containing collections of fees as aforesaid.

5. The doctor shall reside in the village of Champion during the continuance of this agreement, and subject to the terms of his contract shall provide as soon as possible a home there.

6. The doctor further agrees that he will indemnify the Municipality against all actions, claims and demands of whatever nature or kind in any way arising in connection with his personal professional services or the services of other physicians and surgeons acting in conjunction with him.

7. The term Municipality herein shall not include the village of Champion.

IN WITNESS whereof the Municipality has hereunto affixed its Corporate Seal attested by the signatures of its Reeve and Secretary, and the Doctor has hereunto set his hand and seal.

E. H. Griffin, Reeve,
C. Rhodes, Secretary.

Dr. E. H. Freeze,
Dr. W. W. Cross, Minister of Health,
Approved this 25th day of October,
A. D. 1935.

Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to saying nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is pressing heavily on the taxpayers, that there is just too much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on the resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be allowed to draw the most, or the least, water from the well but how the well is to be replenished, and until this can be determined those in authority will have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in double costs for machinery and operation, in addition to the confusion and ineffectiveness attending upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that in connection with these and other activities in the same category objection might be raised that dual services are essential because of the limitations of legislative competence, but that is the sole barrier in the way of economy, then necessary legislative authority to dissipate the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is maintained.

In the matter of sources of revenue also there is duplication which should be eliminated by a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and post-depression years the fields of taxation were fairly well defined and understood and governments, in those days, confined their revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic stringency became more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the water in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While no doubt, many suggested methods for replenishing depleted incomes will be offered, most of them probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

Are You Runder, Tired?

Men of the World, 12 Westinghouse Ave., Apt. 4, Hamilton, Ont., said, "About five years ago I was terribly run down, had indigestion, couldn't sleep at night, and my weight fell off 20 pounds. Before I had found the Hinds' Honey & Almond Cream I felt much better, had more strength and better digestion. Now, I take 50 cents, daily, 100c. Large size, tablets or liquid."

Cannot Get Italian Marble

League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rome marble used in construction of the palace comes from Italy, and much of it is still due to arrive. League sanctions prohibit the reception of goods under existing contract, so the League must look for its marble elsewhere.

Finds Blindness No Handicap

War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champion pair at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands. Blindness has its compensations. Nature to some extent redresses the balance by developing other faculties. Captain Lowry is a reminder of the example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy, the cards are named to him and he remembers them, too. The rest is easy. During the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an ardent golfer and amateur boxer. He still plays golf and boxes. He uses his own hand and drives by instinct. His caddy tells him where his ball lies and where he should hit it, and he never misses. He also learned osteopathy and has built up one of the most lucrative practices in London. —St. Thomas Times-Journal.

Began In Ice Age

Scientists Believe Recent 'Quake Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age. It is at least 25,000 years since the Ice Age ended, and scientists believe it was these same scientists who fixed its guilt.

Dr. L. C. Conant, director of the Cornell University geological station, explained the general theory of earthquakes in the northeast is the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous glacier," he said, "has put a tremendous pressure on the earth's crust. Every once in a while the earth stretches back a bit, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

1935 Tobacco Crop Valued At \$8,000,000

Flue-Cured Tobacco Industry In Ontario Run On Scientific Lines

It looks as if the \$8,000,000 valuation put on the Ontario flue-cured tobacco crop by the experts will be exceeded by the value of the actual crop. Purchasing made by Canadian and British manufacturers within the past few days. Yet it is only a few years since tobacco-growing in Canada was practically limited to a few farmers raising it for personal use or for a limited local market. Approximately 30,000 acres of the best soil in Southern Ontario are now most extensively devoted to the growing of tobacco leaf in a scientific way. This year's crop is estimated to be worth \$8,000,000, and having a selling-value of \$10,000,000. The finest cigarettes and other tobacco products in Canada incorporate Canadian tobacco in large and increasing quantities, where, hitherto, American and other tobaccos had been used, while the Canadian leaf also has an excellent market in Great Britain in competition with foreign leaf.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually teach growers what and how to grow in order to produce quality tobacco, and in other words, to bring the industry up to the level of foreign leaf. The company, at its own expense, brought in the necessary plants for experimentation, made its own chemical and other researches of the soil, of moisture, and other conditions constituting the proper grades of tobacco, taught the grower on his own land by introducing experimental plots, and in other ways interested him in improving and enlarging his crop for the use of the domestic market. It also illustrated to him the process by which the domestic market might be developed in a profitable way. This and the researches of government experts, combined largely to produce the present condition, and to the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

The official edict has gone forth that the new styles for the ultra fashionable gown will not include any wasp waists. There will, though, be a sting in the prices.

Charwoman (to neighbor with whom she is having a spat): "What I says is, there is ladies' an' ladies—'as you ain't neither." 2125

Reform In Examinations

President Of University Of Alberta Would Make Entrance Less Rigid

Entrance examinations to the University of Alberta were in the process of being made less rigid and formal, Dr. R. C. Wallace, president of the university, told 200 southern Alberta high school teachers in an address. He called the final examinations "the bugbear of Alberta teachers."

Reform in examinations would be directed towards leaving the teachers free to express themselves in divinely and then giving some fundamental, broad test to students matriculating from high school to university, Dr. Wallace said.

"We are trying to achieve the aim at the university that every examination paper set shall have one or two questions which cannot possibly be answered by memorizing notes," he continued.

The university president read an example of the type of examination he was proposing a set of four examinations presented by Alberta University authorities to determine a scholarship winner last year. They included general examinations to test knowledge in the fields of English literature, science and mathematics, having none of the formal type of examination question.

Expression of the teachers' personality must be made easier, Dr. Wallace declared, and lessening of the strict examination rules must be the most effective method of accomplishing this end.

All types of political and social theories should be taught in school, Dr. Wallace asserted, but teachers should keep their own personal bias on growth in the background.

Grows Rice For Export

Australia Has Developed New Industry In Ten Years

Australia, which ten years ago imported nearly all of the rice consumed throughout the Commonwealth, is now producing enough for home consumption, but there is a surplus for export. The 1934-35 rice crop of New South Wales yielded 28,000 tons of paddy rice, not including that retained for feed, according to the Agricultural Department of the Canadian National Railways.

Stone Mountain is a massive dome of muscovite granite in Hall county, Georgia, and is said to be the largest in the world.

SASKASAL MINERAL SALTS

Medicinal Salt. Little Known and Little Understood. Sufferers from Rheumatism and other ailments find relief in the use of this mineral salt. It is a natural product of the earth, and is found in many parts of the world. The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuralgia or neuralgia, ask your doctor what he thinks about it. In comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were actually against by physicians, and bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings made in safety were correct.

Remember this: "Aspirin" is used among the fastest of remedies discovered for the relief of headaches of all common pains, and is safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Eliminates Static

Boon For Radio Fans Is Seen In New Demonstration

Radio reception free from static even during thunder storms so severe that sparks leap from the antenna wire is the offering of Major Edwin H. Armstrong, professor of electrical engineering at Columbia University.

He demonstrated the new system before the Institute of Radio Engineers in New York. He described the effect as the name as sending one stream of traffic—the static—through an underground while the desired signals went across the bridge. He said the secret lay in frequency modulation instead of amplitude modulation, the prevailing system.

About 20 per cent of the students preparing for the medical and dental professions in Germany are now women.

Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW Already, thousands of Canadian mothers are benefiting by following Vicks Vapo-Rub for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This common-sense, medically sound plan represents the 30 years' experience of Vicks Chemical in studying colds. It has been tested in extensive clinics by practicing physicians—further proving its everyday home use throughout the world.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Help Build Resistance to Colds Use normally—avoid excesses. Eat simple food and take regular diet regular. Drink plenty of water. Use Vicks Vapo-Rub on throat and chest preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds At the first warning nase irritation, sniffle or sneeze, use Vicks Vapo-Rub—just a few drops on each nostril. Vapo-Rub is especially designed for the nose, throat and upper throat—where most colds start. Used in this way, Vapo-Rub helps to prevent many colds—and helps to help head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks Vapo-Rub. Vapo-Rub acts in two ways: (1) By stimulation through the skin, like a poultice, it relieves the irritation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, breaks congestion, and your family can go to sleep by trying it. Directions for following the Vicks Plan come in each package of Vicks Vapo-Rub and Vicks Vapo-Rub.

MISS ALADDIN

—By—
Christine Whiting Parmenter
Author of
"One Wide River To Cross"
"The Unknown Port," etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care, and the choice of her car-tune for her coming-out party. Suddenly, in the market place, her indulgent father loses all as he had, and the family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tabbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she sees him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is fortunately having no books to read at the idea of starting a public library. She writes a good one, and Nancy writes home to get her parents to send all the books they could spare and all their could induce others to let them have.

Nancy's plans and friends gave their liberal support to her request for books. A shabby box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the place more presentable.

Jack Nelson, Matthew Adams, and Nancy go to the grain house on to their uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a full of school children, which was stalled across the road with its back against a snow-dusted gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding the party of children and Nancy and Jack return home. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

New Qu On With The Story

CHAPTER XXIII.—Continued

Nancy started, smiling as she recognized the wife of the head-seeker on the back road, one of the library's most faithful visitors.

"Come in," she welcomed. "I'm leaving day after to-morrow and am glad of this chance to say good-bye."

The woman said, as she sat down in the cushioned chair: "That's very nice. I meant to stop at Miss Nelson's, but when I saw these open windows I knew you'd be here. I want to thank you for what you've done for—well, for every one in Pine Ridge, Miss Aladdin." She glanced up, her face lighted by a smile, while Nancy realized with something of a shock that this faded woman was quite young, probably not ten years older than herself. "Do you mind my saying, Miss Aladdin?" she questioned a bit shyly. "Sometimes I've almost wondered if that's what you are—a sort of magician who has worked miracles."

Nancy laughed, flushing a little too. "It wasn't a miracle at all, if you mean this library. It was only common sense and a bit of elbow grease."

"Too," answered her caller wisely, "it was more than that. It was thinking how you could make life happier for other folks. It's made all the difference between exile and—home, to us!" she added. "My husband's better now, really better; and it's due to nothing in the world but having good books to read—something to take his mind away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she was gone Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger.

"I ought to have gone to see those people," she said regretfully. "I'll ask Matt to drop in on them some day. Why, the first time that woman came for books I thought she was older than Aunt Judy! Oh, why does life hurt some of us so cruelly?"

Thinking with reluctance, Nancy closed the windows. This was her last visit to the library, for to-morrow she must give Cousin Columbine. The girl stood for a moment looking off at the mountain; and suddenly she longed to view it once again from the hilltop under the old pine.

"I'll sneak up back of the house," she planned, locking the door. If Jack sees me he'll want to go along, and somehow I'd rather be alone. I can stay a half hour and get back before the train goes for us. I do hope Matt will have cheered up by evening. I just can't stand the way his eyes look."

By skirting the village it was possible to gain the hilltop unobserved, but it was a steep ascent, and Nancy was breathless when, emerging from the woods, she started toward the ancient landmark. Then, as an animal will stop when suddenly alarmed, the girl stood still. Some one was there, half hidden by the gigantic tree-trunk. How disappointing! Her

tryst on this wonderful spot must be foregone. She ventured one cautious backward step, but a twig snapped under her foot, and the intruder, alarmed as herself, turned almost quickly.

"Oh!" exclaimed Nancy. Her heart was thumping. "I didn't dream—I mean, Matt, I—I thought."

She paused, for Matthew had sprung up, an unsmiling Matthew, who said, curiously, she noticed as he came toward her, "Is it you, Nancy, or—or am I dreaming? No, I'm not crazy! (He smiled a little.) 'But I've been told here for an hour or more wishing I had the power of Aladdin, so I could rub my lamp and make you appear before me just like that—Is it really you?" Nancy thought, her mouth curving in a smile: "What other fellow in the world would say a thing like that?" Then with a sudden impulse she stretched out both hands.

"Touch me, and see?"

CHAPTER XXIV.

No use trying; it was simply impossible to sleep. This thought Nancy as she turned, and tossed, and thumped her unoffending pillow. The night was weirdly bright, and moonlight was in Colorado, and (perhaps because she knew where each one was), those furnishings of the tower room which seemed so depressing eight months before, were dimly visible: the fat infant embroidered on the "spishier"; the mineral specimen clock which never ticked; the deformed kettles painted in oils; General Grant, and Aurora's mammoth calendar.

"It's awfully strange," murmured the girl, "how you get used to things. I don't see that awful embroidered baby more like that, and I've grown quite fond of General Grant. It just doesn't seem possible that this is our last night in Colorado, and that to-morrow Jack and I'll be jogging along somewhere in Kansas. Why, the day we got here, when Cousin Columbine diagnosed the room so proudly, I thought I couldn't get away from it too soon; and now all I can think of is—suppose we hadn't come!"

About to ponder this awful possibility, Nancy turned again and saw that the door into her brother's room was opening. Said Jack, muffled, irritated tones: "What the dickens is the matter with you, Nancy? That old bed lets out a groan every time you move, and I'd say you've turned over every three minutes of the last hour. Why don't you go to sleep?"

"Too much to think about," I'm figuring out what would have happened if we hadn't come to Colorado." "That's easy," Jack nestled himself on the top of the massive bed. "I'd be earning my car fares in a broker's office most likely; and you'd be struggling round Edgemoor, plying yourself and running up the telephone bill by calling your long-distance pay friends every few hours, just to kill time. Honestly, sis, can you imagine living our whole lives without having Cousin Columbine, or the Adams, or—or going through that blizzard and everything? Maybe you'll laugh, but I feel lots older than when we came."

But Nancy didn't laugh. She said thoughtfully: "You seem older, Jack. And I . . ."

Her self-analysis was no further.

Uses Homing Pigeons

School Teacher Finds Them Handy For Sending Messages Home

Each Sunday afternoon homing pigeons fly into the yard of Martin Tucker of Wakefield, Mass., bringing the glad tidings that his school teacher daughter, Gladys, arrived safely in South Hampton, N.H.

Miss Tucker, who spends every week-end with her family found the telephone too expensive and the mail too slow. Homing pigeons, long a hobby of her father, solved the problem.

The pigeons return to the Tucker home in much less time than it takes for Miss Tucker to drive to South Hampton.

Many of the farmers of Eastern Canada who feed Western lambs during the 1834-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada.

HERE'S The real way TO MAKE BRAN MUFFINS, COOKIES, ETC.

USE Quaker Natural Bran—because it is natural bran especially intended for baking. You'll find it makes better, tastier bran dishes with the real spicy, nut-like bran flavour. And that you'll have better results because, being natural bran, it mixes better and more lightly with other ingredients.

And what is doubly important Quaker Natural Bran is more economical for baking. Try it—there's a recipe folder and a valuable coupon in every package.

TRY THIS SUGGESTION

For a delicious, different dessert
Buttered Bran Raisin Bread
Canned Cherries or Plums
Coffee

Look for the Quaker Natural Bran display at your grocery. He has all the things you'll need for this appealing dessert. The recipe for Bran Raisin Bread is in the package.

Quaker Natural Bran

ESPECIALLY ECONOMICAL FOR BAKING

with Flavour

NABOB TEA is specially blended from the choicest tender young leaves of the finest China tea, and is a real treat to order NABOB, a really good tea.

NABOB

Save "LEFT-OVERS" with Appleford's Presto Pack Waxed Tissue

More convenient to use . . . Just hang a package in your kitchen. You'll be delighted with its convenience . . . for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

Cannot Be Answered

Food For Thought In Child's Question About Speed

The wisest sayings often come out of the mouths of children. A man motoring with his family in the country and discussing with his wife the present-day craze for speed and the disastrous results that so often follow excess of a reasonable rate of travel was interrupted by his little daughter's question:

"What is the speed limit?"

"Thirty-five miles an hour," he answered.

"Then why do they make cars that go faster?"

Ostriches are raised for meat in Russia.

MAKE DELICIOUS CREAM PIES

And all sorts of dainty dishes with Christie's Graham Wafers. They're nourishing and deliciously crisp and fresh. You'll enjoy them any way you eat them. There's a recipe with every box.

Christie's Biscuits

"There's a Christie Biscuit for every taste"

Art. Hopkins returned from the hospital on Friday, and with his family will live in town for the winter months.

Continued from front page.

in establishing safer and more permanent systems of agriculture throughout the different localities of this area.

The Rehabilitation Act, which is being administered by the Experimental Farms Branch, provides, it is believed, a practical and effective plan of attacking the various problems arising from drought by giving active leadership in assisting drought sufferers to become, as the title implies, rehabilitated and to re-establish their farming on a secure and longer time basis. The various methods being proposed are not necessarily new though the idea of the rehabilitation program is original in that it provides for the first time organized means of introducing by practical demonstrations methods and types of farming that have been proved by investigations and experience of practical farmers, to be best adapted for the different regions concerned.

The rehabilitation program is broad in its scope in that it embraces all major phases of the drought problem including the control of soil drifting, grass and forage crop development for feed production, the reclamation of abandoned areas particularly for grazing purposes, tree planting, soil surveys, and last but not least the program includes assistance in providing water for domestic use including stockwatering as well as for the development of smaller irrigation projects particularly where found feasible.

Work carried on from the Lethbridge Station in connection with

the program during the past season and cropping systems are being tested and demonstrated. Another project mainly the establishing of district sub-stations at each of the eight following points,—Pincher Creek, Whittia, Bindloss, Cessford, Youngstown, Castor, Lomond and Foremost. The last two named are entirely new whereas the other six, formerly illustration stations, were converted into district sub-stations where soil reclamation work included strip farming and the use of trash covering for soil drift control as well as various cultural practices.

Regrassing experiment areas, six in all, have been established as part of this work at Bowell, Hutton, Cessford, Stanmore, Sullivan Lake and Sounding Creek near Naco.

Further details of the rehabilitation program may be obtained by writing to the Station at Lethbridge. Any enquiries regarding water development, which will be dealt with in detail in a future letter, should be referred to the Water Development Committee, Swift Current, Saskatchewan.

Canada To Have Streamline Locomotives

Marking the peak of engine development in the fifty years since the driving of the last spike at Craigellachie, the Canadian Pacific Railway has under construction five light-weight locomotives, which are being built to attain a speed of 110 miles per hour. Stream-lined and an increased ratio of power to weight have been incorporated in these engines are quite new, having been originated by Canadian Pacific engineers under the supervision of H. B. Bowen, Chief of Motive Power and Rolling Stock. In addition, the Company's engineers closely watched experiments made by leading railways of other countries, and have adopted and developed the best features brought out. The new Canadian Pacific engines mark a long step forward in locomotive construction.

The first five engines will be used to improve the Company's passenger service between Vancouver and Quebec, and will haul at high speeds trains of new light-weight coaches now being built for the service. They are of 4-4-4 type, with a total engine and tender weight of 430,000 lbs., or about 33 per cent. lighter than previous models, and designed to do the same relative work. This means a consequent important saving in fuel, water and maintenance. The boilers are nickel steel designed to stand a pressure of 300 lbs. per square inch, and fittings and appliances are all of the latest type, including super-heaters, feed water heaters, mechanical stokers, roller bearings and tandem connecting rods. They are a capacity of twelve tons. The tractive effort will be 35,000 lbs.; cylinders 18 1/2 by 28 inches; with the drivers having a diameter of 80 inches. Photographs of the new engine, Bowen Chief of Motive Power and Rolling Stock, Canadian Pacific.
